DANGEROUS GOODS MODULE

Introduction

The Dangerous Goods Module enables the user to maintain information of the DG handled by Johor Port. It provides user with the safety and precautionary steps in handling the DG and also the emergency response. All DG applications must be submitted **48 hours** before **ETA**. Failure to do so may cause extra charges to be incurred.

The standard process in JCTS for import can't be completed by customer unless JCT team downloaded the final departure BAPLIE file into the system. For short transit vessel JCT won't be able to get the final departure BAPLIE file for more than > 18 hours and possibility only up to 4 hours (Singapore / PTP).

In order to resolve the issue, this guideline will ensure user able to conduct the DG declaration of Import units without waiting BAPLIE file. System will then match and consolidate with BAPLIE information upon complete downloaded.

DANGEROUS GOODS MODULE

1 Process

1.1 Stowage Bay Plan for Dangerous container (Import).

Menu: JCTS->Vessel Ops->Stowage Bay Plan:

No	Definition
1	Agent able to declare Import / Transshipment DG Declaration in Stowage Bay Plan and can bypass some mandatory field such as Cell Position, Next POD even EDI BAPLIE Import / Stowage Bay Plan not yet key-in or process.
2	DG information can declare earlier before user process EDI BAPLIE. Once BAPLIE process, it will update based on EDI BAPLIE segment available and will consolidate with the earlier declared DG Container information by the agent in Stowage Bay Plan.
3	No special character allowed.

DANGEROUS GOODS MODULE

1.1.1 Create Stowage Bay Plan:

- Create: If user clicks 'New' button, user can get the screen to input the Stowage Bay Plan information. Column with red color means mandatory item, so user must fill the information in column with red color.
- 'Save' Button: If user clicks the "Save" button after filling all necessary information, data is saved. If user wants to change the information, just change necessary column and save it.
- 'Delete' Button: If user clicks 'Delete' button, Stowage Bay Plan information is deleted and disappeared.
- 'Clear' Button: If user wants to re-start the input on the course of creation, click the "Clear" button. Then previous information is disappeared and the screen is initialized.
